

DOG RUN

Dog Run Exerciser & 12 ft. Tie Out Combined Kit

- **Tougher than chain or rope. Safe for dogs up to 150 lbs.**
- **Easy-to-install hardware includes pre-loaded spring assembly.**

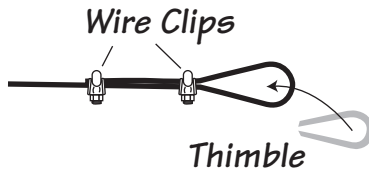

IMPORTANT: Place pulley only where your pet can get sufficient shade and water.

Anchor two screw eyes into solid supports at equal height.

Hang cable end with shock absorber spring onto screw eye.

Take loose end of cable in hand and thread through pulley. Loop cable around thimble and clamp cable together using the two larger wire rope clips positioned 5" apart. Leave wire rope clips slightly loose.

Attach looped end onto the screw eye. Pull cable end to adjust cable tension, then tighten wire rope clips. Use remaining wire rope clips as pulley stops.

Wire Clip (pulley stop)

Attach Tie Out clip to the Dog Run pulley, attach the other end to your pet.

Important Information: (1) Do not use this product with a choker type collar. (2) Never tie your dog near any object that can cause the dog to become suspended or entangled. Always provide sufficient shade and water. (3) Be careful when connecting your dog to the tie-out. Keep your extremities clear of the cable in case your dog lunges. (4) To avoid injuring your dog, maintain constant observation while your dog is tied. Never allow the cable to become kinked, knotted or wrapped around your dog. (5) Periodically inspect the hardware for wear and tear. Replace entire unit if any parts are worn. **REMINDER: NOT ALL DOGS CAN BE EFFECTIVELY TIED-OUT. YOUR SUPERVISION AND GOOD JUDGEMENT ARE REQUIRED.**
