

Speed Wrench & Strap Tensioning Instructions

- One Handed Operation!
- As seen on: TDE Installation Videos
- Cut Strap/Bolt installation time in half!

Part #48900

Tie Down's SPEED WRENCH simplifies anchor installation with a patented design that allows you a one handed operation for installing slotted bolts and tensioning strap. The SPEED WRENCH has a 15/16" (24mm) impact socket on one side and a 15/16" (24mm) "nut" on the other. Combine this with your own ratchet and 15/16" (24mm) socket and you have the fastest way to tighten slotted bolts!

1.

Insert slotted bolt into anchor head, attach loosely. Pull strap past bolt head and cut strap so that 12-15 inches of strap are available to wrap onto the slotted bolt.

2.

Place Speed Wrench over the bolt head. Insert the strap end into the slot in bolt until flush with opposite side of bolt.

3.

Hold Speed Wrench in place, tighten bolt with socket wrench on outside of Speed Wrench (bolt head side).

4.

Move socket to the opposite (nut) side. Hold Speed Wrench in place. Use socket wrench to tighten nut until square bolt shoulder is locked in anchor head.

Instructions #08145 (D1182 - Rev. 1/4/19)
