

KN95 FACE RESPIRATOR

Part ID: 13769

The KN95 face mask is great mask to protect against airborne particulates and hazards, having an efficiency rate of at least 95% of airborne particles >0.3 microns.

A KN95 respirator is a respiratory protective device designed to achieve a very close facial fit and very efficient filtration of airborne particles. The 'KN95' designation means that when subjected to careful testing, the respirator blocks at least 95 percent of very small (0.3 microns) test particles. If properly fitted, the filtration capabilities of KN95 respirators exceed those of face masks.

Applications:

Construction, mining, textile, manufacturing, wood processing, pharmaceutical, electronic, automobile manufacturing and other industries that require particles protective situations.

Features:

- 5-Layers of protection include Filament non-woven fabric, flexible moderate thickness.
- The KN95 is designed to offer more protection than standard disposable 3-Ply masks or your conventional face cover
- The KN95 is lightweight and foldable, its design and overall lightweight structure make this mask easy to store and carry.
- Provide smooth breathing features, with the metal fastening strip ensuring optimal sealing between the bridge of the nose and the mask.
- Standards: GB2626-2006; EN 149:2001+A1:2009
- CDC: Mask is for non-medical use, thus complying with face covering recommendations
- FDA: MFG is Registered under the FDA.gov Data Base

DO NOT:

- Modify, clean, or use incorrectly
- Use for particulate concentrations greater than 10X PEL/OEL
- Use in areas with gases and vapors, oil aerosols, asbestos, arsenic, cadmium, lead, 4,4-methylene dianiline (MDA) or abrasive blasting.

Mask should not be damaged or contaminated. If dizziness, breathing difficulties or other discomforts occur, immediately leave the polluted area.

E1743, Rev. 7/17/20
